Investment objective

Vanguard All-World ex-US Shares Index ETF seeks to track the return of the FTSE All-World ex US Index before taking into account fees, expenses and tax.

ETF overview

The ETF provides exposure to many of the world's largest companies listed in major developed and emerging countries outside the US. It offers low-cost access to a broadly diversified range of securities, industries and economies. The ETF is exposed to the fluctuating values of foreign currencies, as there will not be any hedging of foreign currencies to the Australian dollar.

Notes

- A Past performance is not an indication of future performance.
- B Returns assume reinvestment of all distributions. Returns for periods longer than 1 year are annualised. ETF gross returns are before management costs and taxes, but after transaction and operational costs. ETF total return is the ETF gross return less management costs. Index returns do not allow for taxes, management, transaction and operational costs.
- C Returns assume that an investor purchased units at Net Asset Value (NAV) and does not reflect the transaction costs imposed on the creation and redemptions of ETF units, brokerage or the bid ask spread that investors pay to buy and sell ETF securities on the Australian Securities Exchange.
- D Past distributions are not an indication of future distributions.
- E For a full breakdown of the management fees and costs, please refer to the "Fees and costs summary" section of the PDS.

Australia	4.3	4.3	Other	8.9	9.0

Glossary

Weighted Median market cap is calculated by first ranking all companies in the specified universe in ascending order based on their market capitalisation. The weights of all companies are then summed, and the function steps through the sorted list while keeping a running total of the weights. The value returned by the function as the weighted median value is that belonging to the company straddling the 50% barrier.

Price/Earnings ratio (P/E ratio) is a measure of the market value of a share compared to the earnings of the company. A share with a price of \$10, and earnings last year of \$1 a share, would have a P/E ratio of 10. For a fund, the ratio is the weighted average P/E ratio of the shares it holds. In general, a high P/E suggests that investors are expecting higher earnings growth in the future compared to companies with a lower P/E. Companies with negative earnings are excluded from the calculation.

Price/Book ratio is calculated by dividing the current market price of the share by the book value per share of the company.

Return on equity ratio is a measure of how much profit a company generates relative to its shareholders' equity. For a fund, the ratio is the weighted average return on equity ratio of the shares it holds.

Earnings growth rate is a measure of the trailing Earnings Per Share growth for a given company and share. For a fund, the rate is the weighted average earnings growth of the shares it holds.

Equity yield (dividend) is the dividend income earned by shares, expressed as a percentage of the market price of those shares. For a fund, the yield is the weighted average equity yield of the shares it holds.

In preparing the above information, individual circumstances, for example tax implications, have not been taken into account and it may, therefore, not be applicable to an individual's situation. Before making an investment decision, you should consider your circumstances and whether the above information is applicable to your situation. Vanguard is the issuer of the Prospectus on behalf of the US listed exchange traded funds ("ETFs") described in the Prospectus. Vanguard has arranged for interests in the US ETFs to be made available to Australian investors via CHES Depositary Interests that are quoted on the AQUA market of the Australian Securities Exchange ("ASX"). Vanguard ETFs will only be issued to Authorised Participants. That is, persons who have entered into an Authorised Participant Agreement with Vanguard ("Eligible Investors"). Retail investors can transact in Vanguard ETFs through their financial adviser or stockbroker on the secondary market. Investors should consider the Prospectus or Product Disclosure Statement ("PDS") in deciding whether to acquire Vanguard ETFs. Retail investors can only use the Prospectus or PDS for informational purposes. Distributors of our products must consider our Target Market Determinations ("TMDs") which describe the investors for whom the product would likely be appropriate and consistent with their objectives, financial situation and needs. You can access the PDS, Prospectuses and TMDs, free of charge, at vanguard.com.au. Unless otherwise stated, all currencies shown in this document are in Australian dollars.
