Benchmark information	
Benchmark (Bmk)	FTSE Australia High Dividend Yield Index
Number of holdings	73

Investment objective

Vanguard Australian Shares High Yield ETF seeks to track the return of the FTSE Australia High Dividend Yield Index before taking into account fees, expenses and tax.

ETF overview

The ETF provides low-cost exposure to companies listed on the Australian Securities Exchange (ASX) that have higher forecast dividends relative to other ASX-listed companies. Security diversification is achieved by restricting the proportion invested in any one industry to 40% of the total ETF and 10% in any one company. Australian Real Estate Investment Trusts (A-REITS) are excluded from the index.

Performance return^{A,B,C} (%)

	ETF gross	Bmk	ETF total	Distrib'n	Growth
1 month	1.62	1.62	1.59	0.00	1.59
3 months	5.71	5.75	5.64	1.04	4.60
6 months	7.02	7.06	6.89	1.94	4.95
1 year	22.62	22.69	22.32	7.03	15.29
3 years (p.a.)	14.41	14.41	14.13	7.10	7.03
5 years (p.a.)	12.15	12.14	11.87	6.58	5.29
10 years (p.a.)	10.46	10.46	10.18	6.53	3.65
Inception (p.a.)	10.12	10.08	9.84	6.40	3.44

Year to year franking levels and gross return^{A,B,C,E} (%)

	Dec - Dec		June - June		Franking
	ETF	Bmk	ETF	Bmk	
YTD	7.37	7.41	16.30	16.35	89.0
2026	N/A	N/A	N/A	N/A	N/A
2025	15.37	15.38	13.12	13.03	42.02
2024	11.73	11.65	13.91	13.94	66.90
2023	11.71	11.72	15.29	15.31	96.62

Income distribution^D

Quarter ended	Amount (CPU)	Reinvestment price
31 March 2026	81.1358	\$81.5480

As at 31 March 2026, the gross distribution of 113.9746 cents per unit comprised 81.1358 of net (cash) distribution plus 32.8388 by way of franking credits and foreign tax credits.

Notes

- A Past performance is not an indication of future performance.
- B Returns assume reinvestment of all distributions. Returns for periods longer than 1 year are annualised. ETF gross returns are before management fees and taxes, but after transaction and operational costs. ETF total return is the ETF gross return less management fees. Index returns do not allow for taxes, management, transaction and operational costs.
- C Returns assume that an investor purchased units at Net Asset Value (NAV) and does not reflect the transaction costs imposed on the creation and redemptions of ETF units, brokerage or the bid ask spread that investors pay to buy and sell ETF securities on the Australian Securities Exchange.
- D Past distributions are not an indication of future distributions.
- E The franking level is an indication of the amount of imputation tax credits at the fund level which may be claimable by Australian investors. A higher percentage indicates a larger amount of imputation tax credits attributed relative to the net tax attributed by the fund.
- F For a full breakdown of the management fees and costs, please refer to the "Fees and costs summary" section of the PDS.

Glossary

Weighted Median market cap is calculated by first ranking all companies in the specified universe in ascending order based on their market capitalisation. The weights of all companies are then summed, and the function steps through the sorted list while keeping a running total of the weights. The value returned by the function as the weighted median value is that belonging to the company straddling the 50% barrier.

Price/Earnings ratio (P/E ratio) is a measure of the market value of a share compared to the earnings of the company. A share with a price of \$10, and earnings last year of \$1 a share, would have a P/E ratio of 10. For a fund, the ratio is the weighted average P/E ratio of the shares it holds. In general, a high P/E suggests that investors are expecting higher earnings growth in the future compared to companies with a lower P/E. Companies with negative earnings are excluded from the calculation.

Price/Book ratio is calculated by dividing the current market price of the share by the book value per share of the company.

Return on equity ratio is a measure of how much profit a company generates relative to its shareholders' equity. For a fund, the ratio is the weighted average return on equity ratio of the shares it holds.

Earnings growth rate is a measure of the trailing Earnings Per Share growth for a given company and share. For a fund, the rate is the weighted average earnings growth of the shares it holds.

Equity yield (dividend) is the dividend income earned by shares, expressed as a percentage of the market price of those shares. For a fund, the yield is the weighted average equity yield of the shares it holds.

Forecast equity yield (dividend) is the forecast dividend income divided by the current market price of a share (forecast dividends sourced from FactSet). Within a fund, the yield is calculated for each share and weighted by each share's market value.

Forecast equity yield grossed-up (dividend) is the forecast equity yield grossed up by the historical franking level of each underlying share within the fund.
